

NEW FEATURE RELEASED FOR 2020

Quadra+ Riser Doorsets

Pre-intumesced fire protection A new standard

What does pre-intumesced mean?

The Quadra+ metal door set now has the option to arrive on-site with the **fire stopping material already fixed into place.**

Fail-proof installations

Removes the need for intumescent mastic to be applied on site. Assurance for contractors and building control.

Safety

Avoids working within the riser to apply intumescent, removing fall risk and hazardous working environments.

Workmanship

Removes the final element of labour dependent workmanship, a truly complete pre-assembled door set.

Risk

In making the door set 100% pre-assembled it assists in mitigating risk from an installation perspective.

Program

Time will be saved in the overall installation process.

Simplicity

Only tools required are a cordless drill driver and a level, as well as screws.

Additional system enhancements:

- / Bigger, stronger 50mm fixing flange for when openings are lined
- / Improved quick release pivot system for faster access and engagement
- / Tested and certified from both sides of the door for complete protection
